

NEW PRODUCT BULLETIN:

NU-LINE AIR PASS MUD FLAPS

The mud flap
that helps pay
for itself every
time you drive

Introducing Air Pass Mud Flaps

Fuel Savings: Conventional mudflaps created drag on the truck and trailer when the wind hits it. Combined with “anti-sail brackets” the wind resistance is even higher! Using CFD (Computational Fluid Dynamics) testing on a trailer/tractor combination there was a 0.4% fuel savings with slotted mudflaps.

Weight Savings: On a truck/trailer combination using 4 flaps you could expect at least an 8lb savings over a 5lb rubber flap.

Payback: You may initially pay more for the Air Pass flap, but the fuel savings on a typical truck can pay this back in approximately a year!

Coverage: Lifetime Warranty on normal wear and tear. It does not cover unusual road hazard or back-up situations where the flap is caught under the tire. The warranty applies to the original owner only.

High Quality Materials: Made from an engineered high impact nylon compound that can withstand harsh, cold climates (-70°C)
