Stronger. Value.

- *Precisely matched cups and cones*
- *Engineered for longer life and reliability*
- *“NP” parts feature Timken proprietary designs*
- *Original equipment technology*

Matched Cup and Cone Sets Extend Bearing Life

Built for superior performance and increased reliability, Timken® MileMate® matched cup and cone bearing sets help keep your fleet on the road. Precisely matched sets allow bearing to more evenly distribute loads, extending bearing life.

Timken matched sets help make it easier and faster to install the bearing correctly every time. Replacing bearings is faster with MileMate sets because the matching cup and cone arrive together in one box.

MileMate bearing sets meet or exceed original equipment manufacturers’ specifications, including the specifications for ConMet® PreSet® hubs and Spicer® LMS™ hubs. With 56 sets to choose from, it’s easy to find the right pair for the most popular applications, including manually adjusted and pre-adjusted wheel ends.

MILEMATE® MANUALLY ADJUSTED WHEEL BEARING SETS
