

# OPERATE WITH **EXTENDED UPTIME**

## Timken® Set-Right® Commercial Vehicle Hub Rebuild Kits

As a tapered roller bearing technology leader, Timken can help you increase your fleet's uptime and performance. Engineered to help increase fuel efficiency and simplify installation, Timken® Set-Right® Commercial Vehicle Hub Rebuild Kits are also available for severe duty and wide single tire applications.

### **Accurate Bearing Setting:**

Timken® Set-Right® kits feature bearings that **significantly reduce the width variation** found in standard bearings. Our **tight bearing width tolerance enables consistent and accurate bearing setting** of pre-adjusted hubs.

### **Consistent Bearing Setting:**

**Consistently achieve proper wheel bearing setting**, avoiding the need for manual bearing adjustment and **promoting optimum bearing and seal life**.

### **Streamlined Inventory**

**Management:** With a **wide range of part numbers**, each kit features two Timken MileMate® matched bearing sets and a precision-machined spacer (**five common spacer types available**).

**Longer Lasting Bearings Can Mean More Uptime.** MileMate bearings, manufactured with super-clean, high-strength alloy steel, precision profiles and enhanced surface finishes, feature high load ratings, and **outlast and outperform competitor bearings.\***
