

TransCanadaSales

Introducing a new partnership of outstanding service and industry-leading product quality.

## NEW CHAIN HANGER OPTIONS:

### Low-Friction Pull-Out Tire Chain Hanger

Comes w/ Stationary Alum Checker Plate or Stainless Steel Lid

**TCH6PO**

Easier to operate and service than old-school design.

Simple and affordable alternative to bulky, expensive bearing-based options.

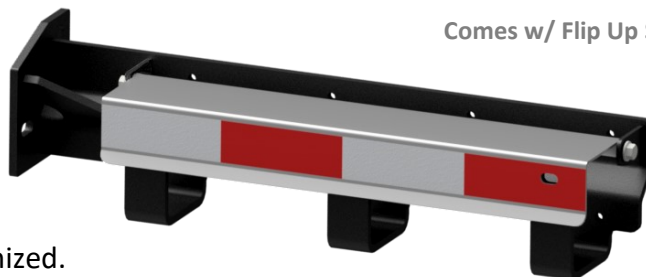

Pad-Lockable through fixed lid/guide plate—steel construction with powder coated finish.

Smooth-action pull-out with no bearings or moving parts, based on low-friction insert and precision-fit design.

### Rear Frame Mounted Tire Chain Hanger / Mud flap Mount

Comes w/ Flip Up Smooth Alum Lid with Reflective Tape

**TCH3-RF**

Tested for fit on most Freightliner, PACCAR (PB & KW), Volvo, and Western Star frames. Some drilling may be required.

Powder Coated or Galvanized.

Features two mud flap mount positions.

The sloped, low-profile base plate is designed to fit the rear frame with a universal-fit slotted bolt pattern that can be used with the existing mud-flap mounting bolt position on all makes and models of truck.
